

iDataPrint™

Compact, intelligent inkjet printer

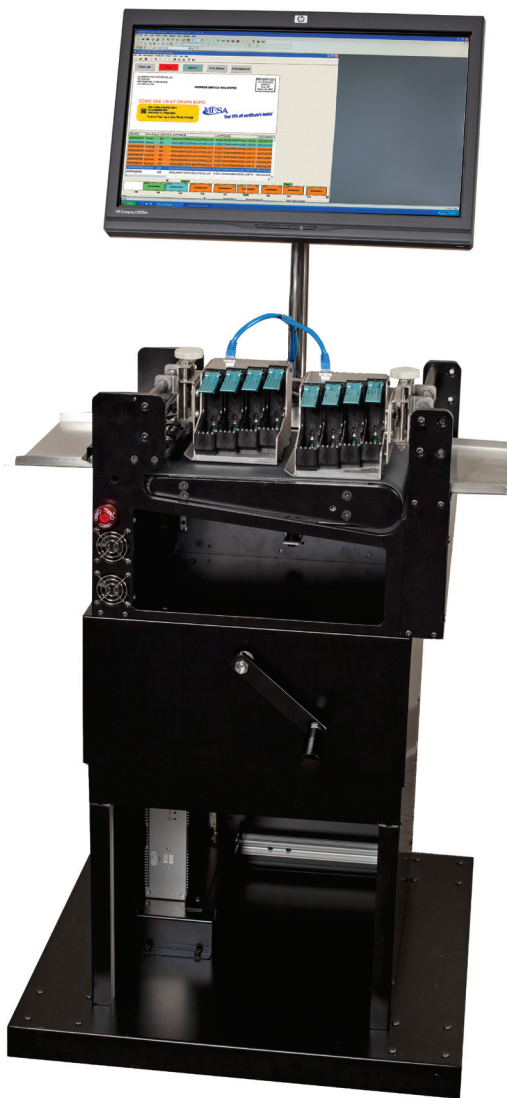

iDataPrint™ can print text and graphics on each envelope passing under the print heads. The printer is designed for high-speed, high-volume printing of envelopes. It features a compact design and a built-in pre-print divert option. The printer is easy to set up and operate, and it provides a clean, professional appearance.

Easy setup and clean operation. Print heads are positioned for easy access and cleaning.

The printer features a built-in pre-print divert option, allowing for easy integration into existing production lines.

Pre-print divert option

iDataPrint™ Features:

- Prints up to 30,000 envelopes per hour of continuous throughput
- Available in right or left feed direction for easy integration
- Our unique integrated pre-print divert feature requires no additional foot print to the iDataPrint™ original size
- With 7 color inkjet printing, it provides high-quality, professional-looking envelopes
- Easy setup and clean operation
- Compact design for easy integration into existing production lines
- Pre-print divert option for easy integration

ServiceInSeconds™

ServiceInSeconds™ is a cloud-based service that allows you to manage your printer remotely. It provides real-time monitoring of printer status, including ink levels, paper supply, and error messages. You can also schedule maintenance and receive alerts when service is needed. This service ensures that your printer is always up and running, minimizing downtime and maximizing productivity.
