

iDataPrint™

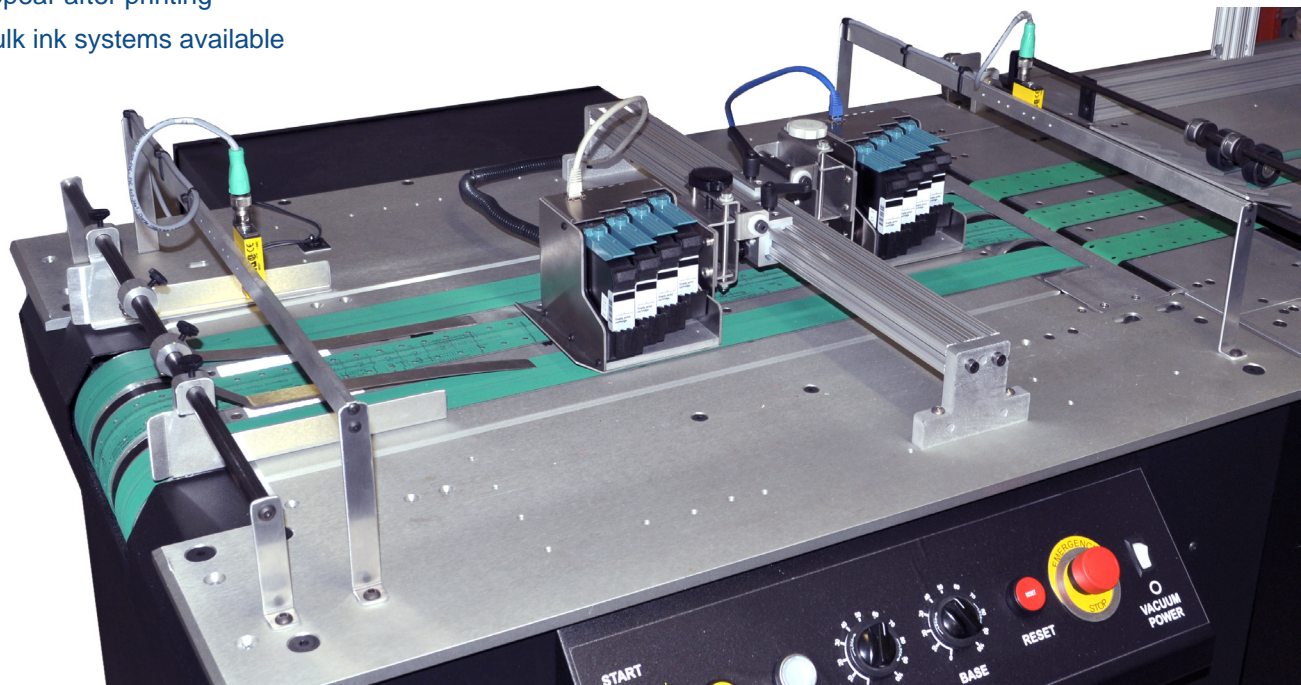

Vacuum Base inkjet

Document Data Solutions' iDataPrint™ can print text, graphics, and graphics on each envelope passing under the print head. Static logos, graphics, text, Permit Mail Indicia, Return Address and 1 to 1 Marketing Messaging are also offered. Actually, the capability is limited only by your imagination.

iDataPrint™ Vacuum Base Features:

- Available with any combination of 2", 4", 6", 8" or 1 ½" Auto-Capping printheads
- Prints up to 30,000 envelopes per hour
- Can be used in-line on any inserter in conjunction with DDS' Read & Print and advanced tracking software for 100% integrity
- Double detect sensors available
- Envelope Layout designer software displays to operator in color, exactly how envelope should appear after printing
- Bulk ink systems available
- DDS's Real-Time Network Architecture allows users to monitor jobs either across machines or multiple sites
- With Df[bn] 7UhfjX[Y '=XYbh]ÙUUh]cb ! along with its network capabilities DDS can track the amount of ink usage in each cartridge. Even when moving the same cartridge to other print systems
- DDS designs and manufactures its own industrial grade embedded PC controller that attaches to the monitor for a compact design
